

Curriculum and School Provision Leadership

At Spring Meadow we provide an exciting and stimulating curriculum for our children. The subjects listed below are all led and managed by key members of staff to ensure equality of opportunity is provided for every child, as well as ensuring the required national standards are set out clearly and that these standards are met by the child at expected points in their academic career.

The curriculum is delivered as creatively as possible, in a 'cross curricular' way to ensure relevance for each child. All teachers plan learning as part of a large team where creativity and imagination thrive and excitement for learning is fostered. If you have any questions or concerns with regard to any specific subject, please contact the named subject leader set out below. If you wish to find out more about the curriculum in its wider sense please speak to your child's class teacher. You can also view our curriculum overviews in the year group tab on the website.
